

Frequently Asked Questions About Recycling

WHY Recycle? You probably already know why it is beneficial to recycle. By not throwing materials away, you help conserve resources and energy. But you can also save money. The cost of your trash going to the landfill is high. *By taking advantage of the recycling program now available in Whitefield, you can cut your trash disposal costs.*

WHAT can be Recycled? Many of the most common household wastes can be brought to the Recycling Center to be made into new products. See the list on the other side of this page.

HOW do I Recycle? Often, the hardest part of doing something is getting started. To begin recycling, pick a spot in your basement, shed, garage, etc. to store the materials. It doesn't take a lot of room. The list tells how to prepare each type of material. Separate containers such as plastic bins, pails, boxes or brown paper bags help in sorting the different materials and handling them conveniently. This makes it very easy for recycling to be part of your household's daily routine. Then, once every few weeks, just stop by the Recycling Center and drop off your materials.

WHEN is the Recycling Center Open? The Recycling Center is open Saturday mornings from 8:00 to Noon. It is located next to the Salt Shed, right behind the Town Office.

WHO can I Contact for More Information? If you have any questions about recycling, you can visit the Recycling Center or call the Town Office at 549-5175, and ask to have someone from the Recycling Committee contact you. We'll be glad to help you out! Also, if you are interested, the Recycling Committee welcomes new members.

THE WHITEFIELD RECYCLING CENTER
